

Java Software Developer

Who we are:

iSX Financial EU Plc is an authorised Electronic Money Institution licensed by the Central Bank of Cyprus. The company provides payments, issuance of electronic money, IBAN addressable stored value accounts and KYC identity verification services to eCommerce merchants, regulated sector businesses and consumers.

iSX Financial EU Plc also operates a sophisticated & patented anti-money laundering and anti-fraud system that also provides transactional security to business and retail customers. It is real time and detects the AML issues currently in focus by regulators.

iSX Financial EU Plc is part of the iSX Financial Group of companies. Our inhouse developed platforms allow us to deliver technology and financial services to our customers. The Group employs more than 125 staff located across our offices located in Australia, Cyprus, Lithuania, United Kingdom, Netherlands, USA, Israel, Malta.

The Role:

As part of our team, you will be involved and responsible for designing and implementing system changes or new products according to the requirements of both our clients and our business. Development responsibilities will involve the entire software development life cycle on our systems platform.

The successful candidate will have excellent coding and debugging skills, familiarity with the entire application lifecycle and a strong desire to contribute to a product that is evolving.

Responsibilities include (but are not limited to):

- System design by analyzing business requirements with stakeholders and peers
- Conduct research and analysis to support solution design
- Observe, test, debug and correct faults in software
- Ensure accuracy and integrity of data for new or existing systems
- Provide system support to clients
- Develop and produce documentation, including technical specifications, unit tests and API's
- Understand and incorporate best industry security standards (such as OWASP) in the design and code of software that you write
- Provide guidance to developers and participate in code reviews
- Maintain security knowledge by attending an educational security workshop at least once a year

Skills and Requirements:

- 5+ years' experience of hands-on software development
- 3+ years of current financial and/or mission critical systems
- BSc or MSc in Computer Science or a related field
