

QA Manager

Who we are:

ISX Financial EU Plc is an authorised Electronic Money Institution licensed by the Central Bank of Cyprus. The company provides payments, issuance of electronic money, IBAN addressable stored value accounts and KYC identity verification services to eCommerce merchants, regulated sector businesses and consumers.

ISX Financial EU Plc also operates a sophisticated & patented anti-money laundering and anti-fraud system that also provides transactional security to business and retail customers. It is real time and detects the AML issues currently in focus by regulators.

ISX Financial EU Plc is part of the ISX Financial Group of companies. Our inhouse developed platforms allow us to deliver technology and financial services to our customers. The Group employs more than 140 staff located across our offices located in Australia, Cyprus, Lithuania, United Kingdom, Netherlands, USA, Israel, Malta.

Responsibilities include (but are not limited to):

- Build, establish, and manage the QA team/discipline for the business.
- Develop quality strategies for products and oversee the development and execution of software test plans and analysis of test results.
- Execute the activities of the software quality assurance function for maximum date and quality predictability, with effective risk awareness and management.
- Work closely with other functional disciplines, especially engineering and design.
- Participate in the writing of effective manual or automated test scripts using approved testing tools, scripting tools and development tools based on documented requirements and technical specifications provided.
- Triage and analyze defects to identify gaps in test coverage and improvements in the team's processes
- Clearly communicate QA results, concerns, project status and potential risks to project schedule to management and stakeholders in a timely manner.
- Review requirements, specifications, and technical design documents to provide timely and meaningful feedback.
- Provide guidance, leadership, and training to QA members.
- Estimate, prioritize, plan and coordinate testing activities for the QA team.
- Develop and apply testing processes for new and existing products to meet client needs.
