

Junior Business Analyst

Who we are:

Probanx Solutions Ltd (Probanx®) is part of the ISX Financial Group of companies. Our inhouse developed platforms allow us to deliver technology and financial services to our customers. The Group employs more than 125 staff located across our offices located in Australia, Cyprus, Lithuania, United Kingdom, Netherlands, USA, Israel, Malta.

Probanx Solutions Ltd (Probanx®) is an international banking software company, founded in 2000 and since September 2019 it is a wholly owned subsidiary of ISX Financial.

With over 20 years of experience, Probanx provides a comprehensive and versatile banking software solution for retail, corporate and private banks, E-Money and payment institutions, offering capabilities that up until now were affordable only by large commercial banks.

Probanx's core banking solution, brings together a plethora of modules with an agile, modern user interface and a forward-thinking architecture, entirely built using Microsoft technologies, that enables financial institutions to choose functionalities and workflows that fit their specific needs.

The Role:

We provide banking software to Financial institutions and E-money institutions and are looking for a Junior Business Analyst as an addition to our team. You will be part of the team responsible to support, design, develop and maintain our custom and core products. You will provide support throughout the product lifecycle and play an integral part in the product design process, by documenting both business requirements and comprehensive solutions for several projects, to increase efficiency and quality as well as assist in the company's growth.

Responsibilities include (but are not limited to):

- Solicit and identify business requirements, address usability concerns and document processes and solutions
- Create and design specifications as requested
- Model business processes and identify opportunities for process improvements
- Identify issues, risks and benefits of existing and proposed solutions and outline business impacts
- Create and develop functional requirements of systems to improve quality, performances, external interfaces, and constraints
- Carryout analysis of requirements by checking for derived requirements that are logical to customers' requests.
- Outline requirement specifications with the use of standard templates for both user cases and detailed software.
- Write / Create product related documents
